JUSTICE AND RIGHT

VOLUME FIFTY TWO

GRAYLING, MICHIGAN, JANUARY 9, 1930

OSCAR P. SCHUMANN, Editor and Proprietor

NUMBER 2

## This Week

by Arthur Brisbane  
France Gets the Gold  
We're All Richer

New Theory of the Universe  
The Sorrows of Wall Street

Some worry because gold is going abroad; \$7,250,000 was shipped to France on the Berengaria, making a total shipment of \$108,000,000 gold for the month.

You admire French financiers when you hear that they got \$30,000,000 of that gold.

How do the French do it? They work and they save.

As your debts diminish you automatically become richer. The people of the United States became richer by about a thousand million dollars during 1929.

Mr. Mellon's statement shows that in twelve months the national debt has been reduced by one billion and nine million dollars.

If Uncle Sam collected his foreign debts as efficiently as he collects from taxpayers at home, we'd be clear of debt soon.

In Germany Mennonite refugees from Russia, encamped with their children, are stricken with a strange disease. Forty children died in a few hours. Many were sacrificed because their mothers hid them from doctors.

Following a Mennonite custom of substituting prayer for medical attention, that method, so, longer works.

"Know the truth, and the truth shall make you free," includes scientific medical truth.

The son of Italy's king will soon be married and 6,000 will be freed from prisons, by way of celebration.

What seems strange in America is a custom old in Europe.

After Admiral Nelson brought his ship into the Bay of Naples, promising to protect the king and queen and their court against the power of the French revolution, many convicts were set free to celebrate.

And kings, on mounting the throne, have often emptied prisons as a sign of joy.

The National Surety company has issued a policy of \$30,000, guaranteeing against the suicide of a man insured within the next two years. The man borrowed money. The bank lending it wanted the added security.

That's new in insurance.

The learned Prof. James Mackay of Dartmouth brings forth a new theory of the universe, pushing Einstein and relativity into the background.

The universe possesses a radiation of super-frequency and super-penetration, pervading all space.

The ether, which Einstein eliminated, returns, but it is a dynamic, not a static, ether.

That deep news interests a few. Secretary Mellon says 1930 will be a super-year, money abundant, interest rates low, business good.

That interests everybody, violently. Infinite time, space and ether will take care of themselves; 1930 and business must be attended to at once.

Now that the "big wind" that swept through Wall Street, blowing away paper profits, has died down, there are mad hearts, but no real losses.

Apparent values, born of imagination and outrageous issues of watered stock, have shrunk by more than twenty-three billions of dollars in three months.

But our national property is all here, including the nicely printed watered stock.

When one concern assembles a few "public utility concerns" and prints 60,000,000 shares of wind and water, with 2,000,000 shares of preferred and he knows how many obligations of the assembled companies ahead of the 60,000,000 shares, something must happen. It did happen.

Among all the sorrows of Wall Street, however, bright spots stand out. Actual dividends declared in 1929 up to December 23 totaled more than \$4,402,000,000, an increase of more than a thousand million dollars over 1928.

We are really not poor, only a little discouraged, some of us, at the idea of beginning over again.

How the years drag for the young! How they fly for the old!

A man past sixty knows that it is only a step to 1931.

A child cannot believe that another Christmas will ever come.

The earth, according to scientists, will last millions of millions of years. But "a thousand years in thy sight are but as yesterday, what it is past, and as a watch in the night."

But that is no excuse for not getting the best possible results from each of 1930's 365 days.

You have, gentle readers, about 119,000,000 American brothers and sisters. The bureau of economic research puts our population at 119,000,000, including you.

We have increased 14,000,000 in ten years, while keeping out, largely, the "unfit European population that breeds crime," according to advocates of restricted immigration.

But we have not kept out crime itself. We have plenty of that.

(© 1930, by King Features Syndicate, Inc.)

## MANY ARRESTS DURING SEASON

A report sent out by the State Department of Conservation shows that during the month of November there were 691 convictions for violation of game laws.

Most of these violations occurred during the deer hunting season, November 15 to 30th. \$19,199.43 was collected in fines and costs and a total of 1,120 days were spent in jail by some of the offenders.

Crawford county contributed 16 offenders to the list, as follows:

Sam Damer, loaded gun in automobile; \$33.85, 1 gun.

Wm. McNally, loaded gun in automobile; \$34.30, 1 gun.

Henry Bearup, carrying rifle in deer area; \$37.35, 1 rifle.

Earl Thompson, having part of doe in possession; \$58.90.

Robert Deshone, having doe in possession; \$58.90.

Hubert Catterfield, having doe in possession; \$58.90.

Stan. Peeder, having doe in possession; \$58.90.

Joe Deshone, having doe in possession; \$58.90.

Lewis Koepke, having doe in possession; \$58.90.

Chas. Koepke, having doe in possession; \$58.90.

Claude Johnson, loaded gun in automobile; \$12.20.

Valenton Johnson, loaded gun in automobile; \$12.20.

Fred Squire, killing a doe; \$81.20.

Floyd Scheerer, killing a doe; \$81.20.

John Okief, possession of illegal venison; \$60.30.

Martin Will, possession of illegal venison; \$60.30.

Otsego county was very meek and dutiful and only registered one conviction. Roscommon county had ten convictions. Marquette county won the banner with 29 convictions, and Oakland county, the home of Oakland 8s and Pontiac 6s was a close second with 28. But it remained for Osoda county to win the grand championship with 38 convictions.

The offenses consisted of almost every imaginable violation from having firms in possession, hunting squirrels, etc. to killing doe deer.

LOCAL FIRM CONTRACTS WITH FORD MOTOR COMPANY

The Mosher Coal and Supply Co. of this city has been chosen exclusive dealers for retailing Ford coal and coke here. Ford coke is a product of the Ford Motor Co. at Fordson, Mich.

The same coke that the great Ford industries use. All of the materials that make smoke and soot are taken out of the coal, meaning when you buy a full weight ton, you actually buy heat.

The Mosher Coal and Supply Co. will gladly give you all the information pertaining to how to burn Ford coke and with your first order you are entitled to the services of a competent heat engineer to inspect your furnace or stove, and advise you how to do your firing.

Ford Pond Creek coal is mined in Kentucky by the most modern methods. This coal passes over shaker screens, taking out all dust and slack, then goes over picking tables where the slate is sorted out. Adding this Ford product to their stock of the famous Kemmont brand has built up a tremendous business for them.

The Mosher Coal and Supply Co. are in a position to solicit your trade with the assurance to you that you are buying heat at the right price. Don't ask for clean coal. Demand it!

## TRUCK FINDS HAVEN OF REST AT BURKE'S GARAGE

Friday evening, the shades of night had fallen, when a driver employed by the Dixie Oil Company steered his monstrous truck up one of the thoroughfares of our thriving metropolis. The monster's flaming exhausts stabbed through the inky darkness of the night and the staccato reports of its wide open cutout roared through the silence even as the roar of machine gun fire in the wastes of no man's land. To the truck its destination was a mystery, particularly so because of the pilot's uncertainty as to the ultimate ending of the journey.

To cut a long story short would be to say that the truck was without a home and had been in quest of such a place during the entire afternoon and evening. Indeed that very afternoon it had sorted its way to the front door of Mr. Burke's home for homeless cars and trucks and requested immediate admittance, complaining of broken arches due to the fact that no self respecting truck could possibly carry an eight ton load of clay. Admittance to the home was refused by Mr. Burke on the grounds that he had no desire to have the truck further injure itself, perhaps seriously, by falling through the floor and landing by chance—by chance we say—in the basement.

The poor truck's pleas availed it not and it sadly made its way downtown continuing its search for a home. After aimlessly roaming around the entire evening and not having found a place to rest its weary wheels, our hero decided to make one more attempt to get into Mr. Burke's garage.

No sooner thought than done. It therefore dimmed its flaming eyes and closing its exhaust and cutout, it sneaked up the alleyway and came to rest in front of the garage.

The door being opened, our truck went in and what was the end? A wreck—a gaping hole in the floor of the garage, and at last our weary friend came to rest in the basement of Mr. Burke's garage? And now the odor of fresh clay mingles sweetly with the aroma of escaping steam, gasoline, etc.

## NEWS & COMMENTS FROM WASHINGTON

(By Congressman Roy O. Woodruff, Tenth Michigan District.)

The close of the year 1929 saw also the close of the first nine months of President Hoover's administration, and he can look back upon a program of accomplishment almost unparalleled in the annals of the country. This program incorporated important problems and innovations of international relations as well as those of domestic economies, and stamp him as one of the outstanding leaders of his generation.

His meeting with Premier Ramsay MacDonald of Great Britain and their negotiations leading up to and arranging for the conference for the limitations of naval armaments, has gone a long way toward bringing about a better understanding between the two countries. This must necessarily result in improved relations, a situation greatly to be desired by all peace-loving citizens of the two great English speaking nations.

Another of the outstanding accomplishments of the President has been the improvement in our relations and friendships with the Latin American countries of South and Central America, brought about through his intimate personal understanding of the temperaments of these people and their industrial and commercial life, together with their confidence in him. For the first time in many years there seems to have been a total disappearance of the so-called anti-American spirit in these countries. And every student of the situation knows that this came about first through Mr. Hoover's trip to those countries immediately following his election, and to his adroit handling of conditions since his induction into office. This achievement means as much, perhaps, to American business as any one thing which has been accomplished.

His program of farm relief—composed of two separate and distinct parts, first the farm relief bill, and second the revision of the tariff in the interest of agriculture. The first is now the law. The farm board has been appointed; it has been supplied with the necessary funds and is now functioning. It is believed that this board will eventually bring about a situation where the American farmer will receive for his products a much larger share of every dollar paid for these products by the American consumer than he now receives.

The tariff bill has passed the House of Representatives carrying big increases in rates on farm products, but is still under consideration in the other branch of Congress. The House rates have in a number of instances been increased by the Senate and I believe the House will concur in these amendments when the two bodies go to conference. The increase will undoubtedly be reflected in the price the farmer receives, and this together with operations of the farm board should put agriculture upon an economic basis which will compare favorably with that of industry.

The tariff bill will become the law before the coming season's farm crops are sent to market, and its beneficial effects will be felt in the coming harvest all down the line. As the benefits accrue, it is well to remember that while a farm relief program has been before Congress every session since 1920, it has remained for the leadership of President Hoover to make its culmination an accomplished fact.

By calling together in conference the business heads of the nation following the Wall Street crash, he did the one thing which could avert an industrial and financial panic. This is the first time such a thing has been done by an American President and it points the way for all succeeding Presidents to follow in the years to come.

His proposal for the reduction of income and corporation taxes was submitted at a particularly opportune time and its prompt approval by Congress was especially helpful in maintaining normal business conditions.

The apparently growing disregard for law and order is a matter of grave concern to every good citizen, and particularly so to the Chief Executive whose duty is to see that all laws are enforced. Mr. Hoover's appointment of a commission to make a study of law enforcement and observance, and to render a report thereon with its recommendations should enable Congress and the President to take such steps as are necessary to bring about an improvement in the present most unsatisfactory conditions.

I have mentioned only a few of the more important accomplishments of the Hoover administration during the short time it has been in existence. There have been many others, each and every one of which contributed either to the economic welfare and happiness of the people or to an improvement in governmental activities.

FIRE DESTROYS A. M. LEWIS DRUG STORE IN FLINT

The drug store of A. M. Lewis in Flint was destroyed by fire early Friday morning. The Flint Daily Journal described the fire in part as follows: "Thirteen persons—six of them women, were driven from their apartments scantly clad early Friday morning, when fire of undetermined origin destroyed the A. M. Lewis drug store at 1214 N. Saginaw St. For a time the entire Howard building, in which the drug store is located, was threatened. Seven apartments, in which men and women were sleeping, and stock of three other stores housed in the building were damaged, with a total loss estimated at more than \$40,000.

Fire Chief Edward H. Price was at a loss to explain the origin of the fire. He said the basement of the Lewis store had been one of the "cleanest in Flint." He said it was possible a wire may have become short circuited in one of the sets of electrical equipment stored there.

The floor and a partition wall fell in. The entire drug store stock and furnishings were insured for \$11,000 but that his loss would amount to at least \$15,000.

Mr. Lewis was a former druggist in Grayling, and we are sorry to hear of his misfortune.

LICENSE PLATES MOVING SLOWLY

There are still a number of automobiles in Crawford county which are not equipped with license plates. County Treasurer Ferguson reports the sale at present of approximately 350 which is only one-third of the number he will sell.

On December 31st, licenses amounting to \$1500.00 were sold but since that time there has been no particular rush. No figures were available at this time however as to the amount the County Treasurer has on hand at present.

Sheriff Bohnmeyer reports very few violators this year. Using a plate for any other year than the year for which issued makes the user liable to a fine of \$500.00 or imprisonment in the state prison for not more than one year or both such fine and imprisonment.

Joseph Cassidy purchased the first license plate in Crawford county for 1930.

The following officers were installed Tuesday evening: Noble Grand—Chris Johnson. Vice Grand—Clarence Robertson. Recording Sec'y—Axel M. Peterson. Financial Sec'y—Paul Ziebell. Treasurer—Hans Peterson.

Following installation, a lunch was served. There was a good attendance.

CARD OF THANKS

We wish to express our appreciation to the friends who so kindly sent expressions of sympathy during our recent sorrow, also Rev. Greenwood, Mrs. Clippert and Mr. Webb for their services.

Mr. and Mrs. Edwin S. Chalker and family.

Mr. and Mrs. William J. Chalker and daughter.

## CIRCUIT COURT NEXT WEEK

Circuit Court for Crawford county will convene next week and according to the statutory time will be held on Tuesday afternoon. The following cases are upon the docket:

Criminal Cases

The criminal docket contains two cases: Mary Elchak, violation of the prohibition law, and Claude A. LaRocque, violation of the motor vehicle law. The latter case involves the killing of Lawrence H. Bell on the night of Nov. 17 while a pedestrian on U. S. 27 near the Roscommon county line.

Civil Cases

Easton-Clark Co., vs. Grayling Laundry Co., trespass on the case. William Long & Fidelity Corporation of Michigan vs. Henry Pennell, replevin.

Chancery Cases

Lena M. Clothier vs. Ernest E. Clothier, divorce.

Hazel Vallad vs. Albert J. Vallad, divorce.

Agnes L. Bissonette vs. George Bissonette, divorce.

Petition for naturalization for Joseph Mallinger will come up for hearing.

No jury has been drawn for the term. It is understood that the case of LaRocque will be continued to the next term.

CELEBRATES 83RD BIRTHDAY

Mrs. Peter Schmidt was 83 years old Tuesday and several ladies, namely, Mrs. T. Beeson, Mrs. James Sorenson, Mrs. Peter Peterson, Mrs. Peter Kjolhede, Mrs. Peter Brown and her neighbors, Mrs. E. G. Clark and Helen Tait, came to her home to spend the afternoon in honor of her anniversary.

Mrs. Schmidt had previously arranged with our local baker for a birthday cake. She told Mr. Craig that she wanted 83 candles put on the cake to get an idea what 83 years old looked like. Eighty-three years is indeed a good many years to live and we do not wonder Mrs. Schmidt wanted to get a picture of the number of years in her mind. She is in perfect health at the present time and we hope she will enjoy many more years of health and happiness.

The ladies enjoyed visiting with Mrs. Schmidt and besides enjoying the cake, indulged in the goodies they brought for the occasion. The ladies spent a very pleasant afternoon and wished Mrs. Schmidt many more happy returns of the day.

GOODFELLOWSHIP CLUB NOTES

After the holiday recess the Goodfellowship Club resumed work Monday evening, Mrs. H. A. Bannan was hostess and after the business session with Mrs. E. G. Clippert in the chair the club listened to an intensely interesting article on "Our Failure in the Philippines," by Henry Cabot Lodge and read by Mrs. Geo. Alexander. A discussion followed. Mrs. Clippert then favored the club with a beautifully rendered solo. Meeting adjourned.

WOMAN'S CLUB NOTES

"Winter Sports" was the topic around which the Woman's Club program centered at the meeting held Monday evening at the home of Miss Isa Granger.

A paper on "Winter Sports in Switzerland" was read by Miss Rosalind Lewis. A general discussion of "Winter Recreation" was given by Mrs. Joseph and Mrs. Frank Teten. The meeting was closed with two vocal selections which carried out closely the general theme of the program.

GRAYLING DEBATORS GO TO WEST BRANCH FRIDAY

The affirmative Debate squad of the Grayling High school will meet the negative debate team at West Branch Friday evening. The following compose the affirmative team: Elizabeth Matson—First speaker. Jessie Lytle—Second speaker. Jerome Kessler—Third speaker.

The negative team of G.H.S., who have been so successful this year in winning points will not participate in this debate.

## AGRICULTURAL NOTES

Though rapid progress is being made in establishing an American potash industry, the United States still spends \$18,000,000 a year for potash imported from Europe.

Daily livestock reports of the Bureau of Agricultural Economics are now broadcast to South America and Porto Rico from Station KDKA at Pittsburgh. The report includes the Pittsburgh, Jersey City, Lancaster, Chicago, St. Louis, and Kansas City markets, and the Boston wool market.

Before the time comes for putting the incubator into service for hatching, it should be cleaned and thoroughly disinfected to destroy disease organisms before eggs are put in it. Be sure that all down and dirt have been removed from the incubator. Disinfect the interior of the machine as well as the egg trays and nursery drawers with an effective disinfectant, such as a saponified creosol solution.

The trapper who tries to outwit the red fox must sharpen his wits, as this fox is keen scented and suspicious and has a wholesome fear of man. Traps and the ground where they are set must be free from human odors. Steel traps may be cleaned by oiling them with twigs of spruce, fir, hemlock, birch, or sassafras, by burying them, or by leaving them in running water for a day or so. After being cleaned they should be handled only with leather or waxed cotton gloves and kept in a clean bag or basket until set. Gray and kit foxes are not particularly wary and are more readily caught than red foxes.

It's a good idea to figure out the daily herd's needs for feed next year well in advance of planting time. Though of course the quantity of feed varies with the cow's size and production, the averaged-sized cow that is on pasture in summer will need almost 2 tons of hay, or 1 ton of hay and 3 tons of silage yearly. High-producing cows require annually from 1 to 2 tons of grain, or even more, according to their production. The yearling heifer needs small quantities of grain and about one-half as much pasture and roughage feeds as a mature cow. It is well to plan for a little surplus of roughage feeds, as any not consumed can be carried over to next season.

Bred sows and pigs need some calcium and phosphorus in their action. Any combination of minerals which contains sufficient lime and phosphoric acid and is palatable enough to be eaten freely will be satisfactory. The following mixture, which is recommended by the U. S. Department of Agriculture, is palatable, contains the elements for supplementing the grain feeds, and may be fed to hogs on pasture or in dry lot: 50 pounds steamed bone meal, 25 pounds ground limestone or airslacked lime, 25 pounds 16 per cent acid phosphate, and 5 pounds common salt. If wood ashes are available, they may be added to the mineral mixture with advantage, at the rate of one-third of the mixture by weight. The mineral mixture should be kept where it will be dry and available at all times.

Skim milk contains practically all the nutrients of whole milk except the butterfat and is an excellent feed for growing calves, growing and fattening hogs when used as a supplement to corn, growing chicks, fattening poultry, and laying hens. The cash value of skim milk fed on the farm in well-balanced rations is equal to the market value of such amounts of other feeds as have the same feed-

ing value. For calves, about 10 pounds of dry skim milk or 10 to 12 pounds of commercial or home-mixed calf meals will take the place of 100 pounds of fluid skim milk. For pork production, when fed as a supplement 100 pounds of skim milk has a feeding value of about 11 pounds of corn plus 7 pounds of tankage. For laying hens, 100 pounds of skim milk will take the place of about 15 pounds of meat scrap. Only sweet skim milk should be fed to calves, but either sweet or sour skim milk may be fed to hogs and poultry.

Feeds such as oats, flax, and linseed meal given to steers toward the last of the feeding period will put them in better condition for shipping. Other grains, and all laxative feeds, including silage and legume hay, should be reduced at least half during the last two or three days before shipping. Some dry roughage such as grass hay should be fed.

A good daily diet for rabbits consists of clean, bright oats (whole or crushed), rolled barley, well-cured alfalfa hay, and a small quantity of green feed, preferably carrots. Wheat bran mixed with an equal part of oats or barley may be fed about once a week with good results. Clover hay may be substituted for alfalfa if the latter is not available. The hay should be cut into inch lengths before feeding. Rutabagas, potatoes, cabbages, mangels, and lawn clippings are good green feeds. Greens should always be fresh and clean and should be fed in limited quantities. Feed the rabbits twice a day.

The first requirement of sweet clover is lime. Probably more failures with sweet clover in the Corn Belt are due to lack of lime than to any other cause. In some sections a ton of finely ground limestone, or one-half that quantity of hydrated lime, well worked into the surface soil is enough. However in many sections it is better to make fairly liberal applications from 2 to 3 tons, preferably of limestone. If sweet clover is to be rotated over the entire farm, lime should be applied to each field before the crop is sown on it for the first time. An exception to this rule may be made in limestone sections where alfalfa is known to do well naturally, or where actual experience has shown that sweet clover will grow successfully without applying lime. Even in limestone sections the surface soil is often deficient in lime.

The New England professor who is an expert on snobbery advises the poor working girl to marry the boss. That is all right providing the boss's does not object.

"A plumber in Bavaria made gold out of a piece of lead pipe." A plumber would.—Toledo Blade.

### EASY! QUICK! GLYCERIN MIX FOR CONSTIPATION

Simple glycerine, buckthorn bark, saline, etc., as mixed in Adlerika, relieves constipation in TWO hours! Most medicines act on only lower bowel, but Adlerika acts on BOTH upper and lower bowel, removing poisons you never thought were in your system. Just ONE spoonful relieves GAS, sour stomach and sick headache. Let Adlerika give stomach and bowels a REAL cleaning and see how good you feel! Mac & Gidley, druggists.

- Chevrolet announces

## THE GREATEST CHEVROLET IN CHEVROLET HISTORY

Today, Chevrolet presents the Greatest Chevrolet in Chevrolet History—a smoother, faster, better Six—with beautiful new bodies by Fisher.

Basically, it is the same sturdy, substantial Six which won such tremendous popularity in 1929. But it is a greater car in every way—for there are scores of vital

improvements which contribute to comfort, performance, endurance and safety!

An improved six-cylinder valve-in-head motor, with its capacity increased to 50 horsepower; four Delco-Lovejoy hydraulic shock absorbers; fully-enclosed internal-expanding weather-proof brakes; a new dash gasoline

gauge; heavier and stronger rear axle; new Fisher non-glare windshield; larger tires—

—these are typical of the many improvements which make this car the Greatest Chevrolet in Chevrolet History.

But most impressive of all—this smoother, faster, better Six has been made available—

—at greatly reduced prices

During 1929, more than a million three hundred thousand persons bought six-cylinder Chevrolets. This enormous volume has made possible many savings in the Chevrolet factories—and, in keeping with its long-established policy, Chevro-

let is sharing these savings with the public. No written description can do justice to the extra value and quality provided in this new car. Visit your Chevrolet dealer—see this car—ride in it—and judge for yourself its sensational value.

## ALFRED HANSON Service Station, Grayling

A SIX IN THE PRICE RANGE OF THE FOUR

### STATE OF MICHIGAN

The Probate Court for the County of Crawford.

At a session of said court, held at the Probate Office in the Village of Grayling in said County, on the 16th day of December A. D. 1929.

Present: Hon. George Sorenson, Judge of Probate.

In the matter of the estate of Samuel Dean, deceased.

Leonard Leenhauer having filed in said court his petition praying that the administration and settlement of said estate be granted to said Leonard Leenhauer or to some other suitable person.

It is ordered, that the 20th day of January A. D. 1930, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hear-

ing said petition. It is further ordered, that public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Crawford Avalanche, a newspaper printed and circulated in said county. GEORGE SORENSON, Judge of Probate.

A true copy. George Sorenson, Judge of Probate. 12-19-4

Advertising in Grayling won't work any miracles that we have ever heard of, but if you want your business to grow and are willing to put some thought to it, advertising will make the people know what you have to sell.

### HAPPY WOMAN TELLS HOW SHE LOST 19 POUNDS OF FAT IN 27 DAYS

During October a woman in Mon-waste matter and harmful acids and tams wrote: "My first bottle of Kruschen Salts lasted almost 4 weeks and during that time I lost 19 pounds of fat—Kruschen is all you need for it—I feel better than I have for years."

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the little daily dose that takes off the fat."—Don't miss a morning. The Kruschen habit means that every particle of poisonous back-

water matter and harmful acids and gases are expelled from the system. At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood carrying Mother's six life-giving salts are carried to every organ, gland, nerve and fibre of the body and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure. If you want to lose fat with speed get up 30c bottle of Kruschen Salts from Mac & Gidley or any five drug store anywhere in America with the understanding that you will be satisfied with results or money back.

### NOW FOR GREATER SAFETY ON MICHIGAN ROADS

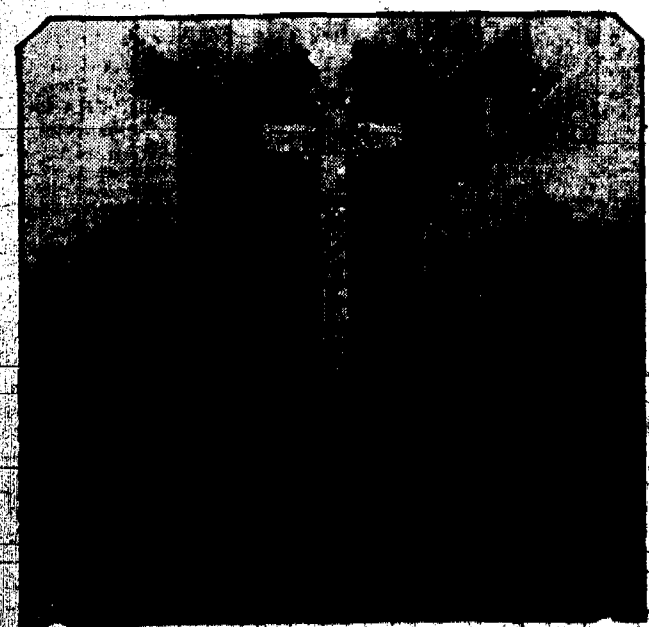

Motorists of Michigan put up more than \$41,000,000 during the past year to help build good roads. Of course, a slice of this went for interest on bonds and some was turned back to the counties to be used presumably for road purposes. But at any rate more than 300 miles of new hard-surfaced roads were added to the

state's permanent possession of the kind and about \$6,000,000 was spent for maintenance of roads already completed.

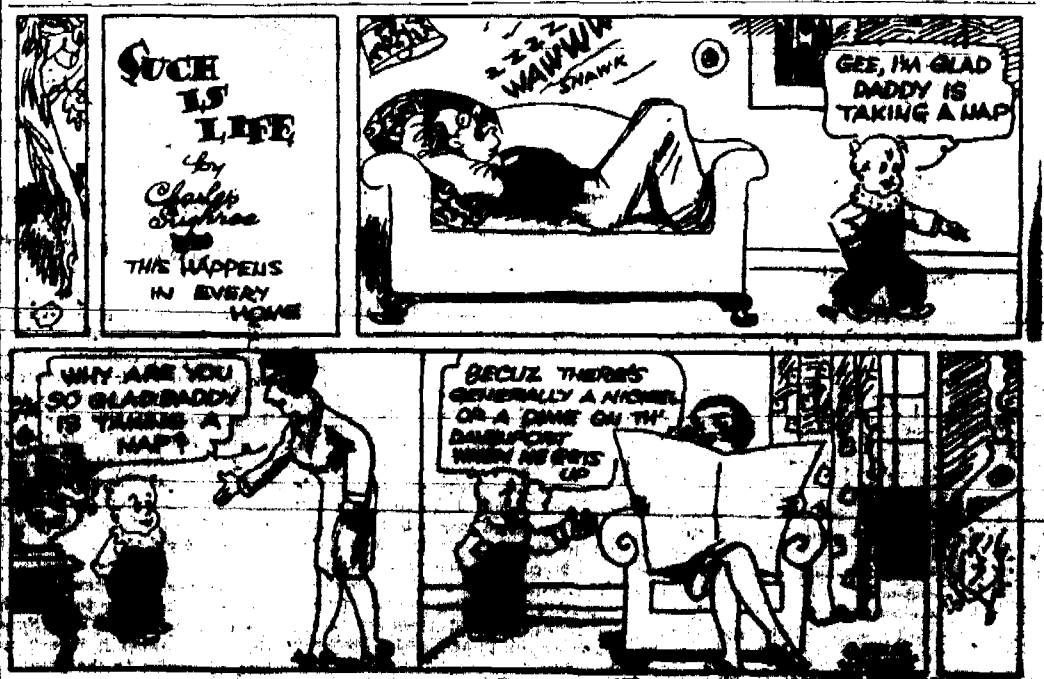

That would be a good road story, if it were not for the tragedy connected with it. But along those magnificent roads about 1,500 deaths occurred in traffic accidents. That was a fatality increase of nearly 25 per cent over the terrible record of the previous year. The State Department

of Highways announces its intention to devote more and more attention to safety precautions. The emergency demands this. So far as the expenditure of money can avail to lessen this slaughter, it should not be withheld. Correcting dangerous curves and doing away with deadly grade crossings are a great purpose for the investment of millions.—Detroit News.

### Altar of German Modernistic Church

This modern view of Germany's newest and highly modernistic Evangelical Lutheran church at Schlegelendorf shows the unusual altar with its cross of black porcelain measuring about seventeen feet in height. The four symbolic figures of the evangelists, depicted in bronze, may also be seen above the altar stands the beautiful baptistry.

## HERBERT BAKER, CHEBOYGAN, MICH.

KNOWN AS "BEARCAT," WAS  
CANDIDATE FOR SENATOR,  
GOVERNOR

Herbert F. Baker, Cheboygan, one of the most colorful figures in Michigan politics of the past 25 years, died there Saturday. He had suffered two strokes of apoplexy, one in August and another on Christmas day.

Mr. Baker, who earned the sobriquet of "Bearcat" by virtue of his many political tactics, was 68 years old. During his political career in Michigan he served five terms in the state legislature, was a speaker for one session, and campaigned once as a United States senatorial candidate and once for the nomination as governor against Alex J. Groesbeck.

Ill Health for Months  
In 1924, when the Green administration took over the reins at Lansing Baker was appointed secretary of the state commission of labor and industry, a position he held until ill health forced him to retire a few months ago.

Mr. Baker started his political career in 1906 when he was elected to the house of representatives, serving three successive terms. In 1918 he was elected senator from the district made up of Alpena, Charlevoix, Cheboygan, Emmet, Montmorency, Otsego and Presque Isle counties for the session of 1919 and was re-elected to the same post in 1921. In 1922 he was a candidate against former Senator Charles E. Townsend, John G. Emery, and former Congressman Patrick H. Kelly. Mr. Baker came in only 25,000 votes behind Townsend who was nominated.

Was Dirt Farmer  
In all his campaigning Mr. Baker boasted that he liked a political fight better than anything else. He described himself as a dirt farmer and enjoyed appearing before audiences coatless with his suspenders showing.

### HUDSON IS NOW AN EIGHT

Hudson is now an eight—the Great Eight.  
And its makers, with a confidence born of 22 years successful experience, are emphatic in their claim that the Hudson Great Eight is an entirely new type in motordom. Prices will be in the well known Hudson range. Power with economy, and without the penalty of over-weighted mechanism is provided by the new Great Eight motor, designed to give the maximum in smooth, quiet performance.

Years of experimentation have preceded the introduction of what Hudson engineers believe to be the maximum performance standards possible in an eight cylinder car, and eight cylinder Hudsons have been tested under every possible condition—using the highways as their testing ground—for the past two years.

The car is ultra-modern, not only in its Great Eight performance standards but in its roominess, body lines and down to the last detail of upholstery, fittings and appointments. The modernistic motif, though carefully restrained, is apparent from the first glance at the new models.

Two chassis are available, the standard wheelbase being 119 inches, and the larger size, 126 inches. While the two chassis differ in length, to accommodate standard or deluxe bodies, and in all minor details, they are identical as far as design and fundamental structural features are concerned.

Low cradled, giving the latest close-to-the-ground effect and thus emphasizing the trend to the modernistic, full balloon tires provide the maximum riding comfort under all conditions.

There are ten body types. The Coach, Sedan, Coupe, Phaeton, Roadster, and Sun-Sedan are on the 119 inch chassis; the larger, 126 inch chassis, carries the touring sedan, 7-Passenger Sedan, Brougham, and 7-Passenger Phaeton body types.

### NAVAL OFFICERS TO ARMS CONFERENCE

Navy Recruiting Station, Detroit: It is announced that the following naval officers will accompany the Admirals Pratt and Jones to the Arms Limitations Conference in London: Rear Admiral Moffett, Chief of Aeronautics; Rear Admiral Pringle, President Naval War College; Rear Admiral Yarnell, Chief of Engineering; Rear Admiral Hepburn, Chief of Staff, U. S. Fleet; Capt. Van Keuren, Bureau of Construction and Repair; and Capt. Smyth, Naval Ordnance. They will act in an advisory capacity.

### CRIME DOES NOT PAY

An inmate of the Michigan Reformatory at Ionia, just a mere boy, but serving a long term for robbery armed, has in his possession two letters that cry out with a voice of thunder, "crime does not pay."

These two pitiful letters were written by his brothers; one younger than himself, the night before they were to be executed for murder. Almost their last acts on earth was to write their brother beseeching him to "lead a better life; to go back home at the end of his prison term and devote the remainder of his life in living down the tragedies of the past."

If there is one time in life when the average human being speaks the truth without reservation, it is in an hour like that. These two boys, with their prospects before them, desperately chose a life of crime. Too late came the awful realization of what their folly had cost them.

They carried with them a mass of blood, should cause every young man on the brink of a criminal career, to ponder deeply before taking the fatal plunge. No, crime does not pay.

### FREDERIC NEWS

Wonderful weather, hope it keeps up.  
The holidays are over and everyone seems to be busy. School resumed Thursday and everyone ready for work.

Miss Evelina Barber has been on the sick list for the past week. Glad she is able to be around again.  
Miss Doris Corsaut returned to Yala, Michigan, Saturday, after spending the holidays with her parents, Mr. and Mrs. E. A. Corsaut.

The Misses Lola Craven, Clarice Welch, and Elsie Burke were home for the holidays.  
Miss Lavina Royston and Mr. Walter Leffingwell of Mt. Pleasant spent Sunday at the home of Mr. and Mrs. C. S. Barber and family.

Miss Olive Odell who is attending Central State Teachers College at Mt. Pleasant, spent the holidays with her parents, Mr. and Mrs. Jay Odell. She returned to Mt. Pleasant Sunday. Mr. and Mrs. Odell also entertained their nephews, John and Leonard Odell of Linden, Michigan.

We are sorry to learn of the death of Mrs. Wm. Chalkers, well known resident of Maple Forest. Also the death of Mrs. Louis Layman who died at her home in Middleville, Michigan on December 22.

Mr. and Mrs. C. S. Barber were presented with a nice "Majestic radio" as a Christmas gift from their children.

Grandma Horton returned to Lansing where she will spend the winter with her son Harry.

The Watch Meeting that was held at the school auditorium New Year's eve was enjoyed by all. Lunch was served in the dining room. Bella rang the old year out and the new year in. Mr. Ace D. Leng is confined to his home with illness, this writing.

Mr. Elmer Corsaut has returned to Detroit after spending the past couple of months with his wife and family.

Mr. and Mrs. Wm. Leng and Mrs. Albert Lewis and daughter Rose spent New Year's in Flint.

Miss Esther M. Barber, the eldest daughter of Mr. and Mrs. C. S. Barber of Frederic, was united in marriage to M. J. W. Downer of Lansing, Michigan on January 1st. They are spending their honeymoon in Flint, Detroit, and Lansing. The young couple have many friends who extend best wishes and congratulations.

Miss Bernice Allen who is employed as stenographer in the Saginaw Public Library, spent Christmas with her parents, Mr. and Mrs. Ben Allen and family.

The young lady who came to live with Mr. and Mrs. J. W. Payne will be known as Edith Joan.

Mrs. Wm. Cox is spending a few months vacation at her old home in Kentucky.

Mr. Peter Harmon of Pontiac spent Christmas with his family at the home of Mr. and Mrs. Geo. Horton.

### FLIES PLANE BACKWARD

Navy Recruiting Station, Detroit: The naval service generally and naval aviators particularly, are greatly interested in the recent performance of Art Gobal, Pacific flier who, in California, while testing a propeller built for that purpose, flew a plane backward for thirty minutes, afterward, in landing, stopping the plane "in its tracks." The performance is of special interest to naval pilots due to the frequent necessity of landing on small surfaces aboard plane carriers, while its value in formation flying will undoubtedly be great.

### Champion Pea Eater

Miss Lucille Anderson of Los Angeles holding her special knife with which she won the world's pea-eating championship by eating upwards of five thousand peas in exactly one minute and ten seconds.

## CHEVROLET ANNOUNCES REDUCED PRICES

Announcement last week of substantially reduced prices on the new 1930 Chevrolet Six, at the same time that the car embodying many distinct improvements made its public bow, created a sensation in automotive circles here.

Reductions as announced by W. S. Knudsen, president and general manager of the Chevrolet Motor Company, range from \$25 to \$50 on seven of the twelve models in the 1930 line, while three new body types introduced for the first time this year are priced to parallel the new low figure on models retained in the current series. The present base price of \$495 brings the six cylinder Chevrolet to within five dollars of the lowest price at which even the four cylinder Chevrolet was ever sold.

This made possible, Mr. Knudsen explained, because 1929 was Chevrolet's greatest year, with an output of 1,350,000 units. Economies of production, manufacturing, plus savings effected by quantity purchase of raw materials, brought about lowered production costs, which, consistent with the Chevrolet policy, are now being passed on to the consuming public.

The new range is from \$355 for the light delivery chassis to \$475 for the sedan against 1929 prices of \$400 for the light delivery chassis to \$725 for the convertible landau. All prices are f.o.b. the factory, at Flint, Michigan. A table of new and old prices follows:

Model	Old Price	New Price
Roadster	\$525	\$495
Phaeton	\$525	\$495
Sport Roadster	New Model	\$525
Coach	\$595	\$565
Coupe	\$595	\$565
Sport Coupe	New Model	\$525
Club Sedan	New Model	\$525
Sedan	\$575	\$545
Sedan Delivery	\$595	\$565
Light Del. Chassis	\$400	\$355
1 1/2 Ton Chassis	\$545	\$520
1 1/2 ton chassis with cab	\$850	\$825

### ONE BUCK TO 22 DOE DEER

A report covering the first four months of the Department of Conservation's deer tally shows that the ratio of sexes among the deer in Michigan's woods is one buck to 2.2 does.

The deer tally was undertaken by the Game Division last summer in an attempt to answer some of the questions which individuals, organizations and the Department have been asking about deer. "Are the woods full of dry does?" "Is there a scarcity of fawns?" "Is the one buck law seriously depleting the supply of bucks?" These were some of the questions asked, and for which an answer was sought in the deer tally.

The tally was made along roads, rivers and salt licks. Counts were also made at night with spotlights. During the four months of July, August, September and October, conservation officers, game wardens, game refuge men and members of the staff of the Game Division counted 8,348 deer in the two peninsulas. Of these 3,502 deer were classified as "uncertain" because their sex or age could not be accurately determined when they were observed.

Of the number identified 2,061 were does and 1,946 were fawns. The fact that the number of does and fawns is about equal, is thought by the Game Division to indicate that the deer are at least holding their own. Bucks numbered 288.

Reduced to percentages, these figures show that of the deer identified 41 per cent were does; 40 per cent were fawns; and 19 per cent were bucks.

While the flat ratio for the whole state was one buck to 2.2 does, in Mac & Gidley's Drug Store.

## MICHELSON MEMORIAL CHURCH

GRAYLING, MICHIGAN

John Wilfred Greenwood, Minister.

## The Pentecost Year

1900TH ANNIVERSARY

30 A. D.—1930 A. D.

PENTECOST THEMES:

TIME: 10:30 A. M.

### SUNDAY JANUARY 12

### SUNDAY, FEBRUARY 23

Theme: "Saving anew—the membership of the church."

### SUNDAY, MARCH 2

Theme: "Evidence of vitality—Growth."

"We believe that our American civilization will fail only insofar as the character of the American people fails. We believe that the character of the American people will fail only insofar as we toss away our religious convictions. The Church stands to clarify and deepen RELIGIOUS CONVICTIONS."

## BONKURA TREATMENT Brought Amazing Quick Relief to My Stomach Trouble

Burton Man Had Given Up Hope Stomach Fine Now. Tried Other Medicines But All Failed

MR. CHAS. VOSE

"For many years I was the victim of constipation, stomach, kidney and liver trouble," said Mr. Charles Vose, P. O. Box 13, Burton, Mich. "Gas pains and a stuffy crowded feeling were features of my indigestion. After eating peaches and certain kinds of fruit, I would continually spit up a hot liquid and particles of undigested food. I was troubled with dizzy spells from a disarranged liver and have been subject to backaches and pains across my kidneys."

"Bonkura treatment proved to be just the medicine I needed. One treatment corrected my stomach disorders and thoroughly cleaned out my system. I now have a wonderful appetite and can eat anything without distress. The dizzy spells have been overcome and my kidney trouble much relieved. In a week's time I was feeling like working again and had lots of the old pep back. I will continue to use BONKURA so that I will not be bothered again. I am very pleased to recommend BONKURA treatment to anyone because when a medicine can do what it has done to me in a week, what will it do in a few more weeks?"

Bonkura is sold by Mac & Gidley's Drugists.

Every pretty girl may think that she has the rest of the world sitting up and taking notice, but she will remember that it takes more than looks to get far.
